

DACKOR has a new high-tech coating line. The coating line was 3 years in the making and is the first wide-format 60" hot coating line in North America. The line features dual melters, two lacquer/UV coating stations, Excimer with nitrogen for super-matte as well as custom embossing line.

Below are the details of our capabilities:

- Coating to uncoated rolls of PVC films, Paper rolls, PET and Recycled PET films.
- Coating of Hot Coating with Corundum (aka... Aluminum Oxide) and Non-Corundum.
- Interior and Exterior grade. For exterior rolls the base material must also be exterior grade.
- 3000 to 5000 taber abrasion.
- Prints may be rotary gravure or digital.
- Various textures and gloss levels possible.

Applications:

- Floor.
- Membrane pressed steps, tray tables, tops.
- Profile wrapped parts.
- Digital print coats for custom designs.
- Exterior Decking, Marine components, Transportation components, Awnings, Exterior Signs, Bldg materials.
- Super matte, anti-fingerprint designs for rolls of paper, PVC or PET.
- RV Tops, RV Steps, Wall Applications.
