

# RETAIL ENVIRONMENTS AND DISPLAYS

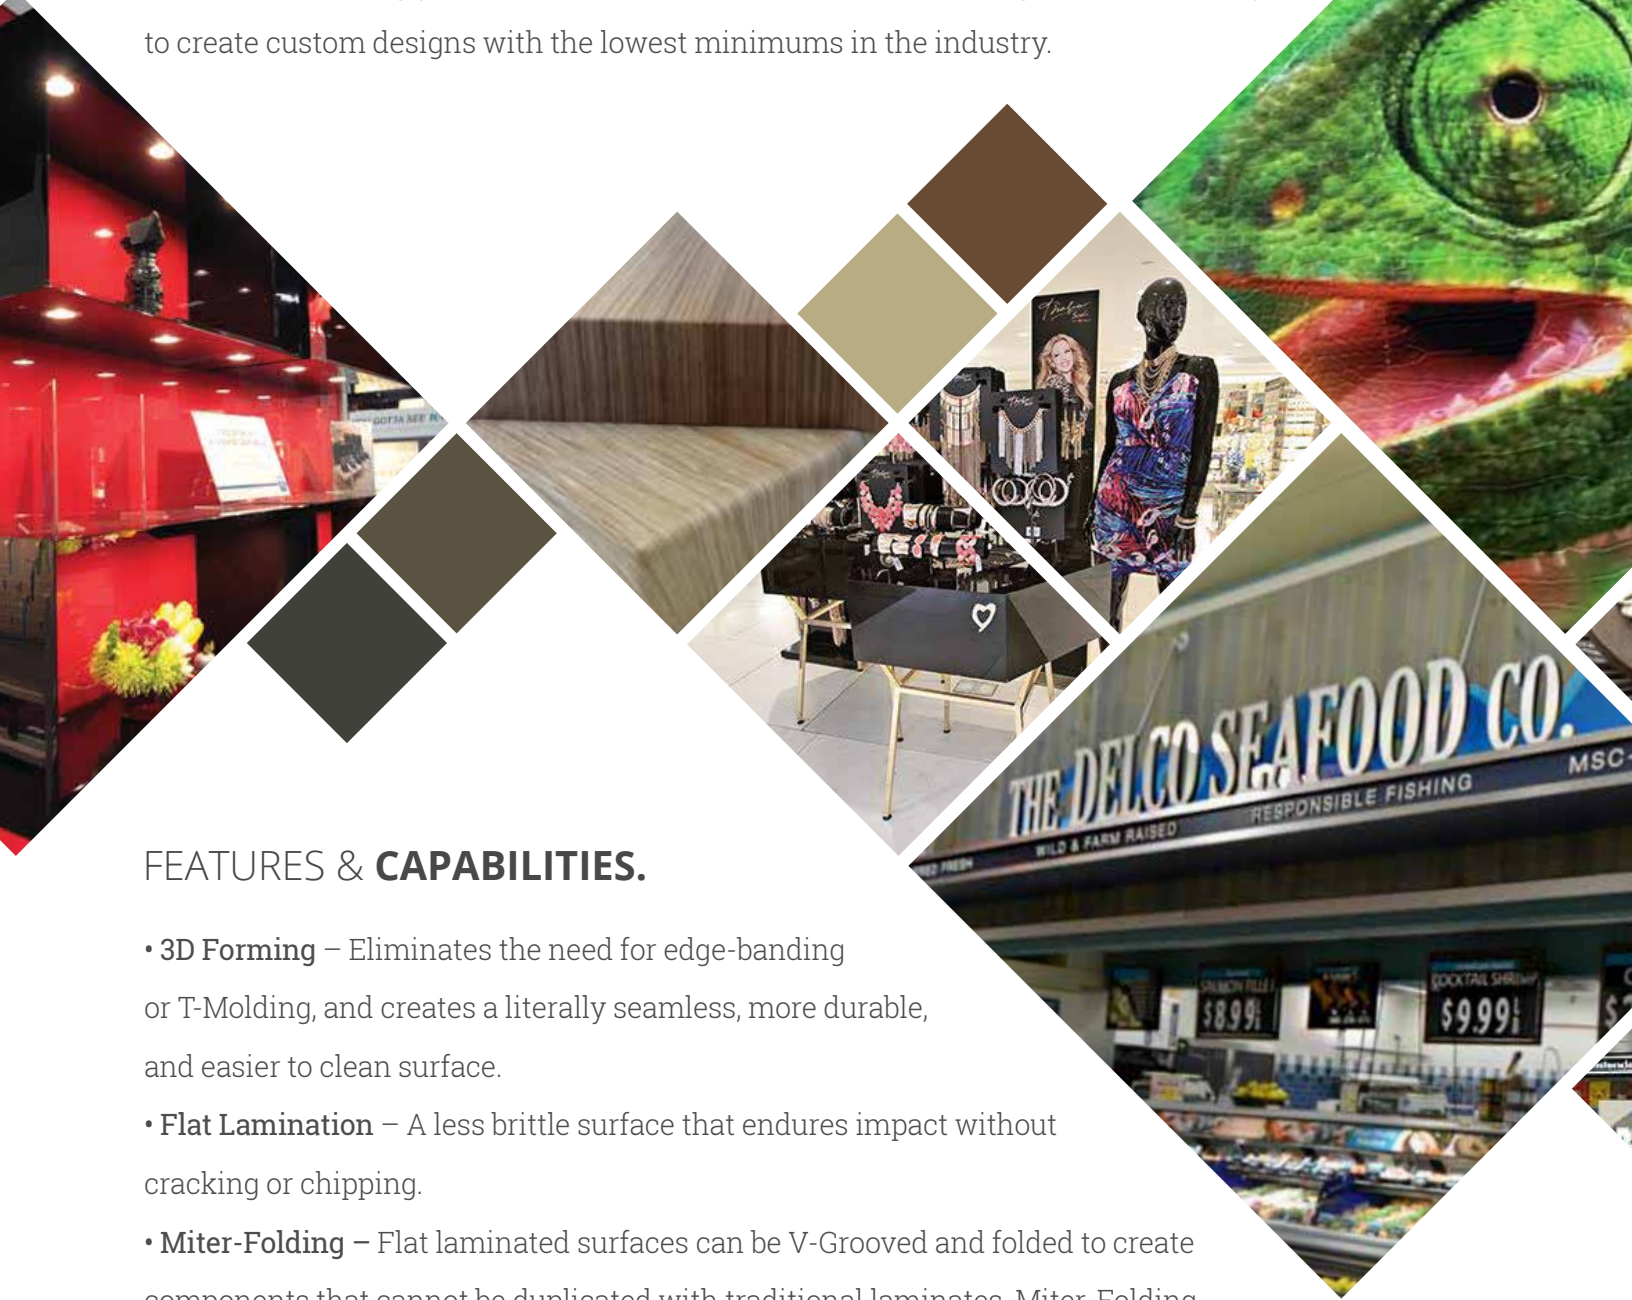

FIXTURES | WALLCOVERINGS | SIGN

**STAND OUT.** Grab the attention of your customers with eye catching colors and textures.

## WHERE DESIGNS **FORM.**

**3D Laminates.** As an alternative to High Pressure Laminates, our materials offer significantly greater impact resistance and capabilities. The choices you have with Dackor are seemingly endless, with over 170 stock colors and designs, and the ability to create custom designs with the lowest minimums in the industry.

## FEATURES & **CAPABILITIES.**

- **3D Forming** – Eliminates the need for edge-banding or T-Molding, and creates a literally seamless, more durable, and easier to clean surface.
  - **Flat Lamination** – A less brittle surface that endures impact without cracking or chipping.
  - **Miter-Folding** – Flat laminated surfaces can be V-Grooved and folded to create components that cannot be duplicated with traditional laminates. Miter-Folding allows for lower cost of materials as well as assembly.
  - **Profile Wrapping** – Provides the ability to create light-weight framed displays and wall trim.
  - **Peel & Stick** – Perfect for refacing existing fixtures or making last minute changes on flat surfaces.
- All you need is a straight blade!

TRANSFORM YOUR **SPACE.**

**Rhino Hz.** This extra durable collection is designed for high traffic areas, such as retail displays and horizontal surfaces. Our super durable topcoats and broad range of textures provide peace of mind against scratching and everyday wear and tear. Aside from an array of stock colors, custom designs are available with extremely low minimums.

**PEELstix**  
THE STICK ON LAMINATE™

CREATE COMPELLING **ENVIRONMENTS.**

**Peelstix.** Our innovative laminates are durable, consistent, easy to apply, and cost effective.

Peelstix can be utilized in manufacturing to save time and cost by eliminating the need to use glues. Peelstix can be a valuable solution for on-site renovations without power tools or harmful chemicals. Peelstix can even be installed while a store remains open, which drives sales.

## THE PEELSTIX **ADVANTAGE.**

- Comes on a continuous roll for quick machine set up
- Innovative pressure sensitive adhesive that can adhere to metal, wood, foam, plastic, pvc, etc
- Flexible material great for curves and post forming
- Ability to match wall coverings to signage, for reception and retail areas
- Trim and slit with standard utility blades
- Eliminates the need for paint, contact cement, glue, etc
- CNC routable laminate

**Wallcoverings & Fixtures.** Refresh worn fixtures and walls by applying Peelstix to any flat or slightly rounded surface. Installation can be done during business hours by an in-store Visual Merchandiser or Planogram leader.

**Sign.** Stand out and grab the attention of your customers with our eye catching colors and textures. With low minimum custom color capability and digitally printable laminates, you can utilize Peelstix to expand on the creativity of your branding.

**Refacing.** A clean, easy to install and cost effective makeover! Backed with a high-tack acrylic adhesive, Peelstix can be applied to cabinets, fire doors, accent walls, partitions and more.

**Cabinetry Casework.** Reface instead of replace! Give your old cabinet boxes a brand new look with Peelstix. Furthermore, we can help you purchase cabinet doors that are made out of the exact same laminate, for a perfect match.

**Partitions.** Among the easiest of applications, partitions in offices or restrooms can be quickly re-designed with nothing more than Peelstix and a utility knife.

## THE DACKOR **DIFFERENCE.**

Dackor specializes in laminates that can be utilized by manufacturers, installers, designers, or architects. Dackor laminates can be employed to create compelling retail environments, modern living spaces, eye catching hospitality atmospheres, or lively office settings. Dackor boasts one of the largest laminate stock inventories in North America, backed by a customer service and sales team ready to meet your project's deadlines.

To help fulfill challenges in project specifications, Dackor offers special services, from a small roll program to slitting and protective peel-coat applications. Take advantage of being able to utilize designs with a smooth, seamless finish, with fresh new styles and elegant craftsmanship.
